Repository Requirements

-Repository folder must be given Windows "Users" account with Modify rights

-If the repository folder needs to be restricted from a certain user account, that user must have at least modify rights to the contents of the folder

-In a Multi-User Dokmee environment, the repository folder must be shared out to everyone on the network. If a user account is created to log into the repository, these login credentials must be entered in the Repository settings of Dokmee.

Licensing

-Dokmee ECM requires an internet connection to activate licenses.

-If behind a proxy server of firewall blocking port 80, Dokmee will not be able to activate. Must open the connection for that computer or contact the Office Gemini support team to activate manually.
