• Must have Administrative access to install.

• SQL may have other requirements IIS 7 and up (Internet Information Services)

• .NET Framework 4.5 (includes .NET 2.0 and 3.0)

     o Windows Communication Foundation HTTP Activation

     o Windows Communication Foundation Non-HTTP Activation

• .NET Framework 4.5 Advanced Services

     o ASP .NET 4.5

     o WCF Services

          HTTP Activation

          TCP Port Sharing

• Internet Information Services

     o Web Management Tools

          IIS 6 Management Compatibility

               ◊ IIS 6 Management Console

               ◊ IIS Metabase and IIS 6 configuration compatibility

          IIS Management Console

     o World Wide Web Services ⬚

          Application Development Features

               ◊ .NET Extensibility 3.5

               ◊ .NET Extensibility 4.0 ASP

◊ ASP .NET 3.5

◊ ASP.NET 4.5

◊ ISAPI Extensions

◊ ISAPI Filters

Common HTTP Features

◊ Default Document

◊ Static Content

Security

◊ Basic Authentication

◊ Request Filtering

◊ Windows Authentication

Repository Requirements

-Repository folder must be given Windows "Users" account with Modify rights

-If the repository folder needs to be restricted from a certain user account, that user must have at least modify rights to the contents of the folder

- In a network setup where the repository folder resides on a different machine than the one running Dokmee ECM, ensure the folder is shared and accessible to the host machine. If a specific user account is established for accessing the repository, the login credentials for this account must be configured within the repository settings of Dokmee ECM

Licensing

-Dokmee ECM requires an internet connection to activate licenses.

-If behind a proxy server of firewall blocking port 80, Dokmee will not be able to activate. Must open the connection for that computer or contact the Dokmee support team to activate manually.
